

# CFD Futures Indices Policy

Unlike the Index Futures, the CFDs on futures and indices do not have an expiration date. Unless the relevant CFDs positions are closed by you, the CFDs on Indices and futures that have Index futures as an underlying asset are automatically rolled over to the next underlying Futures contracts and price is adjusted. This is known as the Expiration Rollover. You should be aware that whenever an Expiration Rollover occurs, we will charge you an amount equal to the Spread of the underlying Future being rolled over.

Therefore, where you have open positions that you do not wish to have rolled over to reflect effectively the new tradable Futures contract, you should close your position(s) and/or cancel open orders before the rollover date.
